

Here is the list of items attached to the Git.

1. High level test plan
2. Test cases (success cases) for the end point named STORE

Please note that due to the time restriction of 4 hours I could not able to complete the below assignments.

1. Business Requirements and Acceptance Criteria (Can developed easily with some extra time)
2. Automation of test cases (Can be easily automated using the Rest Assured framework along with Selenium)
